Prescribing indicators - Opioid analgesics (P\_1\_12)

Version: 2.00

Date: March 2026

Authors: Konstantinos Daras & Benjamin Barr

## Overview

### Indicator title

Prescribing indicators - Opioid analgesics (P\_1\_12).

### Indicator family name

Prescribing indicators.

### Summary

This indicator measures the number of Opioid analgesics that are prescribed on a quarterly basis by all practices in England, including GP practices. Numbers are given for the total number of items prescribed/dispensed and the total net ingredient cost (NIC) since 2011, across areas of England.

### Technical description

The data covers NHS prescriptions of Opioid analgesics (see Appendix I) written in England and dispensed in the community in the UK. Prescriptions written in England but dispensed outside England are included. The data includes prescriptions written by GPs and other non-medical prescribers (such as nurses and pharmacists) who are attached to GP practices. To allocate the prescribed items to each LSOA area, the Patients registered at a GP practice at Lower Super Output Area (LSOA) level was used. Patients Registered at a GP Practice dataset is a quarterly publication by NHS Digital and provides count of patients by gender.

Additional information about the GP Practice Prescribing Chemical-level Data and Patients Registered at a GP Practice can be found at:

GP Practice Prescribing Chemical-level Data: <https://digital.nhs.uk/data-and-information/publications/statistical/practice-level-prescribing-data>

Patients Registered at a GP Practice: <https://digital.nhs.uk/data-and-information/publications/statistical/patients-registered-at-a-gp-practice>

### Unique Identifier

P\_1\_12

## Construction

### Data sources

Denominator:

Mid-year population estimates for England, provided by the Office for National Statistics (ONS). Population estimates are released in the summer following year end.

#### Numerator:

The number of Opioid analgesics that are prescribed on a quarterly basis by all practices in England at the LSOA level.

#### Data filters:

The denominator is the Mid-population estimates provided by ONS 2011-2020 and requires no filtering. The numerator is the number of Opioid analgesics prescribed quarterly and It is produced by filtering the following BNF codes from the entire prescribing dataset (see Appendix I).

## Presentation

### Breakdowns

#### Time period

Quarterly data: Q1 2011 – Q4 2025

#### Demographic

Person

#### Geographic

Lower Super Output Areas (LSOA) level in England

#### Disclosure control

This indicator has been produced using only publicly available datasets.

### Output: p\_1\_12\_{year}\_{quarter}\_LSOA.csv

Column name	Description
LSOA11	LSOA code
ALL_PATIENTS	Number of patients (estimation based on the GP patients population - quarterly published by NHS Digital).
ITEMS	Total prescribing items
NIC	Total Net ingredient cost
ALL_AGES	Mid-population estimates (ONS 2011-2020)
ITEMS_R	Total prescribing items rate
NIC_R	Total Net ingredient cost rate

## Revision history
